

CAREER OPPORTUNITY

African Rainbow Minerals (ARM) is a leading South African diversified mining and minerals company with operations in South Africa and Malaysia. ARM mines and beneficiates iron ore, manganese ore, chrome ore, platinum group metals (PGMs), nickel and coal and has a strategic investment in gold through Harmony Gold Mining Company (Harmony).

PROJECT ENGINEER: MECHANICAL (D-UPPER PATTERSON GRADING)

Job Responsibilities:

To manage the mechanical engineering discipline of multibillion rand capital projects from a client representative perspective.

Location:

Sandton, Johannesburg

Job Requirements:

- BSc. Mechanical Engineering/Diploma in Engineering (NQF level 6) or equivalent.
- Government Certificate of Competency (GCC).
- Project Management qualification and experience will be an advantage.
- Experience in mechanical design and installation of major capital projects within mining and related industries.
- Registration as a Professional Engineer will serve as an added advantage.
- A minimum of 8 years' experience in managing the mechanical engineering discipline in major capital projects.

Job Responsibilities:

- Guide the EPCM Company in terms of mechanical standards and designs to be used.
- Construction and commissioning of the mechanical systems in
- green field/brown field expansion of the Assmang operations and ancillary infrastructure.
- Ensuring compliance with Mine Health and Safety Act & Regulations,
- EMPR, WULA and all other statutory requirements in the design and implementation of equipment and systems.
- Ensuring that the requisite HAZOP studies are conducted during project implementation.

- Provide weekly, monthly and quarterly feedback to the project manager. Work closely with contractors, subcontractors, operations and senior management to support and guide the mechanical project team in their effort to achieve key milestone deliverables.
- Provide strategic, expert advice and consultation on the design and implementation of the mechanical systems within the scope of the project.
- Ensure that companywide standards are strictly enforced.
- Supervise the ARM Project commissioning and transfer of the necessary expertise into the Operational Teams, by providing training concepts and interventions.
- Motivate and lead the mechanical EPCM team, both at the company's head office as well as on site.
- Identify contract variations; negotiate variations or additional work within the mechanical scope.
- Represent the company in dealings with contractors and other stakeholders and legislators.

Personal Attributes:

- Analytical and conceptual abilities;
- Superior mechanical engineering knowledge;
- Strategic thinker with excellent planning and implementation skills;
- Output orientated; Problem Solver
- Good leadership qualities with a strong presence;
- Good negotiation skills;
- High Emotional intelligence;
- Tenacious and able to work in a remote environment.

Equity Statement:

Preference will be given to suitably qualified applicants from designated groups in line with the employment equity plan and targets of the organisation.
