- Minimum 3 years' post-trade experience.
- Appropriate medical fitness for a mining environment.
- Mining, mineral processing, concentrator or heavy industrial experience.
- Experience with conveyors, chutes, hoppers, bins and structural steelwork.
- Experience in Boilermaking and fabrication, Welding, cutting, Structural and plant repairs.
- Valid driver's licence.
- Ability to work outdoors in demanding physical conditions

Job Responsibilities

- Execute planned, preventative and breakdown maintenance activities.
- Fabricate, install, repair and modify steel structures and plant components.
- Perform welding, cutting, fitting and assembly activities.
- Repair chutes, hoppers, bins, platforms, guards, supports and related plant structures.
- Read and interpret engineering drawings, sketches and work instructions.
- Conduct inspections and identify structural defects, wear, cracks and damage.
- Respond to breakdowns and execute repairs within the scope of the trade.
- Complete work orders, inspection sheets and maintenance records.
- Comply with MHSA requirements, company standards and engineering procedures.
- Apply isolation, hot-work, working-at-height and other applicable safety requirements.
- Maintain tools, welding equipment and work areas in a safe and serviceable condition.
- Participate in planned shutdowns, maintenance campaigns and continuous improvement initiatives.

Technical

The successful candidate should demonstrate:

- Structural and plant repairs.
- Engineering drawing interpretation.
- Mechanical maintenance.
- Fault identification.
- Safety and legislative compliance.
- Quality and attention to detail.
- Problem-solving.
- Teamwork and communication.

Equity Statement:

Preference will be given to suitably qualified applicants in line with the employment equity plan and targets of the organisation.
